Kaps LED upgrade

Kaps LED Upgrade Kit for all microscopes of SOM[®]-series

Are you also tired of the everlasting lamp replacement and the associated costs?
We can help with our LED retrofit kit*:

- Up to 30 years, no change of the illumination element - LED lifetime approx. 50,000 hours
- Effortless and detailed work as with daylight-color temperature 5,600 K
- Adaptable to situation-adjustable light intensity for your particular claims
- Save energy with the high efficiency of LED-power consumption of only 50 W

➔ Order no 162-322-100 E

* Some microscope equipment updating to LED lighting is possibly associated with a replacement of the swivel arm.
Upgrade available for all cold light illumination microscopes from S/N: 6,000.
